JD - Software Development Engineer 2

About ALLEN Digital:

At **ALLEN Digital,** we spearhead a technology-driven approach to education, leveraging top-tier tech talent from leading technology firms. Through our strategic collaboration with Bodhi Tree Systems, a prominent venture capital firm known for building & scaling tech-first brands, we are revolutionizing education with a tech-first approach.

We address two critical challenges in the current education landscape: the need for more emphasis on holistic learning and adopting a one-size-fits-all approach. We are leveraging AI to develop an innovative ed-tech platform to provide students with a compelling end-to-end learning experience. Our goal is to transform education by providing personalized learning experiences that transcend traditional classrooms by catering to individual learning needs and to drive significant improvements in learning outcomes.
